Subject: RE: Leviathan Mine - Aspen Seep and CUD Provisional Flow Data - April 2017

Dear Mr Brown,

Thanks!! S It isn't clear, why ARC' latest tracking data sheet seems to indicate that providing the requested weir data is open as an 'action item'? Just wanted to say thanks for providing and we look forward to receiving it on a quarterly basis.

Best Regards,

Lynda Deschambault

Subject: Leviathan Mine - Aspen Seep and CUD Provisional Flow Data - April 2017

Lynda,

As requested in the U.S. EPA's April 25, 2017 email, Atlantic Richfield is providing provisional flow data from the weirs located at the Aspen Seep (a.k.a – overburden seep or OS) and CUD. The attached data file covers the time period from January 1, 2017 through April 30, 2017. Atlantic Richfield is still reviewing flow data from May and anticipates providing those data by June 30, 2017.

Please note that all flow data transmitted to the U.S. EPA this way are considered provisional and subject to further verification and possible revision. Data will be considered final when provided as part of the project database.

Should you have any questions or comments please contact Tony Brown at (657) 529-4537 or anthony.brown@bp.com.

Thanks,

Marc
